

Ntsako Lubisi

SOFTWARE ENGINEER | DATA ANALYST | TECHNOLOGY PROFESSIONAL

lubisin299@gmail.com | **+27 65 916 2212** | [Github](#) | [LinkedIn](#)

Objective

Results-driven technology professional with a Bachelor of Science in Computer Science and Information Technology and practical experience in software development, technical support, data analysis, training, and business operations. Skilled in C#, SQL, ASP.NET MVC, web technologies, and process improvement, with a proven ability to optimize workflows, support stakeholders, and deliver technology-driven solutions.

Experienced in bridging technical and business needs through data-driven decision-making, operational support, and user-focused problem solving. A quick learner with strong analytical, communication, and collaboration skills, passionate about leveraging technology to improve efficiency and create measurable business value.

Experience

University of the Free State | *Hardware and IT Instructor*

Aug 2022 – Nov 2022

- Delivered training on computer literacy, software applications, and hardware maintenance, improving participants' technological proficiency and confidence in using digital tools.
- Designed and facilitated hands-on learning sessions that increased learner engagement and enhanced practical understanding of computer systems.
- Provided individualized technical support and mentorship, enabling students and community members to overcome learning challenges and achieve training objectives.
- Assisted learners in developing foundational IT competencies required for academic and professional environments.

University of the Free State | *Student Assistant*

Jul 2023 – Nov 2024

- Provided administrative and academic support within the Computer Science Department, contributing to the efficient delivery of departmental operations.
- Assisted students with programming concepts and C# development, improving understanding, problem-solving abilities, and academic performance.
- Monitored attendance, assessments, and performance data, ensuring accurate record-keeping and effective student progress tracking.
- Supported lecturers with academic and administrative activities, helping maintain smooth course delivery and student engagement.

MTN SA | *Graduate Trainee*

Apr 2025 – Present

- Provide operational and administrative support within the Partnership Channel, contributing to efficient day-to-day business operations.
- Analyze and manage channel data to improve reporting accuracy and support informed business decision-making.

- Coordinate communication between regional Partner Account Managers and Head Office teams, strengthening collaboration and reducing operational bottlenecks.
- Identify and implement process improvements that enhance workflow efficiency, productivity, and service delivery across the channel.
- Support stakeholder management activities and resolve operational queries, ensuring timely communication and business continuity.

Education

University of the Free State, Bachelor of Science

Feb 2020 – Nov 2024

Major: Computer Science and Information Technology | Minor: Business Management

Skills & abilities

- Technical Skills
 - SQL (data querying, analysis, validation)
 - C# (application development & logic structuring)
 - HTML, Java, XML
 - Data Analysis & Reporting
 - Systems & Process Analysis
- Core Competencies
 - Attention to Detail
 - Analytical Thinking
 - Risk Awareness
 - Problem Solving
 - Communication & Stakeholder Engagement
 - Process Improvement
 - Data Integrity & Accuracy
